

Pear Comprehensive Diabetes Educator Program

This program, developed by Pear Healthcare Solutions Inc. and available at healthlearning.ca, was created with the goal of helping pharmacists or other healthcare professionals prepare to challenge the Canadian Diabetes Educator Certification Board (CDECB) examination to achieve the Certified Diabetes Educator (CDE®) credential. The Comprehensive Diabetes Educator Program consists of 40 modules and is accredited by the Canadian Council on Continuing Education in Pharmacy (CCCEP) for 20 CEUs (continuing education units).

The program was developed in consideration of the CDECB required competencies. The content is matched to the specific competencies required to obtain the credential of CDE, so it provides a **strong foundation** for preparation for the CDE examination through completion of brief online modules of approximately 30 minutes in length.

For more information about topics included in this program, visit healthlearning.ca.

As a member of CPCAC, you are eligible for a 20% discount on the tuition for the Comprehensive Diabetes Educator Program. CPCAC will provide specific codes for this discount.
